## EXPERIENCE

### FRONT-END || E-COMMERCE

We worked with an API and gave functionallity, such as purchases cart, purchases history, suggestions by category, filtered by name, login, product details, and more..

**Html - Css - React - Redux - React Router**

[react-ecommerce.app](#)

### FRONT-END || RICK & MORTY

Working with the Rick and Morty's API showing characters with pagination, search input by location and showing the information of each of them

**Html - Css - React - Javascript**
